EXPERIENCE

Wyoming Machinery - IT / PC Support Technician | Oct 2025 - May 2026

- Resolved hardware, operating system, and network issues for 500+ employees, closing 100+ tickets/month with same-day average resolution time.
- Provided technical support and maintained reliability across 500+ workstations.

InsurXcel - Software Developer Intern | June 2023 - Jan 2026

- Built and maintained C# REST API endpoints powering an insurance rating engine, consumed by both an internal admin dashboard and a self-service quoting portal used by 3+ companies.
- Developed Angular front-end components for an internal admin dashboard used by 3 client companies to manage and review insurance quotes, later extended with a self-service quoting portal powered by the same API.

PROJECTS

SoloSuite (Node.js, TypeScript, Docker, Google Calendar API)

- Built and deployed a Node.js/TypeScript backend for solo service workers that automatically blocks time on the worker's Google Calendar based on client provided appointment details, using OAuth-authenticated Google Calendar API integration
- Live at solosuitededemo.buck-marshall.com - please contact for live demo

PHaSTphoto (React, OpenAI API)

- Built a React web app that organizes and searches photos using AI-generated tags via the OpenAI API, developed collaboratively with a 4-person team using Git
- Implemented a boolean search query system enabling filtering across 20+ tags, searching 50+ photos quickly

Portfolio Site (React)

- Designed and built a responsive React portfolio site to showcase software projects, with a focus on simple design and maintainable code

Additional Software Projects

- Additional work available at github.com/Marshy8

EDUCATION

University of Wyoming - Laramie, WY

Bachelor of Science in Computer Science, Minor in Mathematics | Aug 2021 - May 2025

Cybersecurity Certificate | Aug 2021 - May 2025

Cum Laude | GPA: 3.935 | Trustees Scholar (Full-Ride Academic Scholarship)

LANGUAGES & TECHNOLOGIES

Languages: C#, JavaScript, TypeScript

Frameworks & Runtimes: Node.js, React, Angular

Technologies: REST APIs, Google Calendar API, OAuth, OpenAI API

Tools: Git, Docker, Jira
